Walk Type Share: Stay Connected while you walk

A1Brains InfoTech is a professional offshore web and Mobile application development company in India, which offers offshore development services since 2003.
Agenda:

Client required an iOS & ANDROID OS compatible social networking application which should be quick and user friendly using inbuilt camera of device.

Satisnet.com Value Add:

1. Developed an avatar for application branding.
2. Transparent Keyboard embedded with font editor is one of the unique functionalities developed to use the APP on the WALK
3. We have given Standard Switch functionality via button to turn ON / OFF inbuilt camera and FLASH for clear view of the Path ahead.
4. It is therefore called as Walk and Type and Share (Walk Type Share) application
5. Also added Image capturing functionality during messaging.
6. The code has been sliced lean and optimized to increase battery efficiency
7. Compatible with iPhone 3GS, iPhone4, iPhone 4S, iPhone5, iPod touch (3rd generation), iPod touch (4th generation), iPod touch (5th generation) and iPad and Android 2.2 and up

Recommendations:
1. Video capturing feature while messaging
2. Add more people in the network through our email marketing tool.
3. The application in which massages can easily Share through Twitter, Facebook with transparent keyboard screen & background camera to avoid mishap while messaging.
4. Unique logo for application
5. Should be compatible with iPhone and Android
6. Indulge advertisement in application for revenue generation
